SUMMARY

Computer Science graduate (USF, May 2026) with hands-on experience building full-stack web applications, data analysis pipelines, and AI-powered tools. Six years of operations management experience at a national retail brand, including developing internal software to automate shipment processing and reporting. Seeking full-time roles in software development or data analysis — available immediately or upon graduation in May 2026.

TECHNICAL SKILLS

Languages	Python, SQL, JavaScript, R, Ruby, C, C++, C#, HTML/CSS
Frameworks	Flask, Ruby on Rails, SQLAlchemy, Pandas, NumPy, Scikit-learn, Chart.js, Leaflet.js
AI & ML	Claude API, Gradient Boosting, Feature Engineering, OpenCV, Pillow, Computer Vision
Tools	Git, Tableau, Excel, Google Sheets, pdfplumber
Databases	SQLite, PostgreSQL, MySQL, SQL Relational Databases

PROJECTS

FlakkAi — AI Code Analysis Platform

Python · Flask · Claude API · JavaScript

Built an AI-powered code analysis platform that detects bugs, security vulnerabilities, and performance issues in real time. Supports multi-file upload, analysis history, and 13+ programming languages — powered by Claude API (Anthropic). github →

FlakkOps — Operational Intelligence Dashboard

Python · Flask · SQLite · pdfplumber · Pandas

Built for current employer to automate weekly shipment manifest processing, track hundreds of SKUs, detect new products before arrival, and surface AI-powered operational insights. Reduced manual data processing time by ~80%. github →

Histacruise — Full-Stack Cruise Tracking Application (In Progress)

Python · Flask · SQLAlchemy · Chart.js · Leaflet.js · PostgreSQL

A thoroughly architected full-stack web application for tracking personal cruise history with comprehensive analytics. Features user authentication, interactive port maps via Leaflet.js, Chart.js spending visualizations, photo galleries stored as BLOBs, a social community layer, and a full data pipeline. Demonstrates end-to-end system design from database schema to front-end UX. github →

Data & ML Mini-Projects

Python · Pandas · NumPy · Scikit-learn · Matplotlib

A collection of focused analytical projects including a **Customer Segmentation Analysis** (2,000 records, 5 personas, r = 0.02 income-spending correlation) and a **Cruise Price Predictor** ML model (5,000 records, 93.5% accuracy, Gradient Boosting vs. 4 benchmarked models). github →

EXPERIENCE

Operations Manager (1st ASM)

Jan 2020 – Present

Skechers USA

- Developed **FlakkOps**, an internal tool automating weekly shipment manifest processing and SKU tracking
- Analyzed sales data and KPIs to identify trends and drive daily operational decisions
- Built and maintained scheduling systems to optimize team coverage and labor efficiency
- Led cross-functional coordination across departments for process improvement initiatives

Sales & Office Associate

Jan 2017 – Dec 2019

Three Seasons LLC

- Managed garden center operations including inventory tracking and shipment intake
- Created digital sales materials and maintained customer database and appointment scheduling

EDUCATION

B.S. in Computer Science Aug 2022 – May 2026

University of South Florida, Tampa FL

- Coursework: Algorithms, Data Structures, Databases, Software Engineering
- Built full-stack applications and data analytics projects as practical coursework extensions

Associate in Arts Degree Aug 2017 – May 2020

State College of Florida, Bradenton FL

- Completed via dual enrollment while in high school
